 - Simplify decision-making

Sage ERP X3 for Distribution delivers benefits across the core processes of your business

- Sales management Purchasing Procurement The inventory, sales and purchasing functions for
- The inventory, sales and purchasing functions form the backbone of the supply chain. To streamline the entire chain, the flow of goods and services can be configured to match the company's organisation. Sage ERP X3 for Distribution also provides features for optimising operational management, including sales management driven by a single business partner management system, flexible pricing rules and customer tracking. The purchase control function, with business partner management and incorporating supplier performance tracking, gives you end-to-end control over the entire supply side, from requesting prices and quotations to matching supplier invoices.
- Inventory management and the warehouse management system Inventory data integrity is ensured by the stock module, which checks stock quality and quantity according to the management practices of each site. The WMS module raises the performance bar on all logistics operations, from receiving goods to deliveries from the warehouse. Offering a comprehensive Radio Frequency enabled system, optionally combined with voice picking functionality, the operators' workload and the required equipment is calculated and optimised.

Finance

Financial accounting, cost and budgetary accounting with support for multiple companies, multiple sites, multi-legislation, multiple accounting plans and multiple currencies, and management of spending and investment commitments. Management of payment deadlines, debt collection, payments and factoring. A company can be managed simultaneously with several accounting plans, either dedicated or shared, with each plan meeting specific needs based on location, accounting standard, activity and business. Financial divisions will benefit from analytics and consolidated view reporting, thereby offering an overview of the activities of all companies. Specific add-ons extend the solution's functional coverage to consolidation, cash flow, bank communication and credit management.

• Decision support tools have become essential management aids for analysing and measuring a company's key data: sales performance per customer or product, from trends in expense accounts to manufacturing cost analytics. Seamlessly integrated into Sage ERP X3, the decision support tool allows users to collect, consolidate, model and extract a company's data for informed decision-making and provide corporate strategy stakeholders with an overview of the activity in question.
