

Sage ERP X3

Sage Enterprise Intelligence

Today many companies are challenged with trying to access information stored in their enterprise software systems in a timely and meaningful manner.

Sage Enterprise Intelligence is an intuitive business intelligence solution, integrated with Sage ERP X3, which helps business users reduce time spent on analysis and reporting and take faster, better-informed decisions.

Empower managers with simple to use, yet powerful and rich self-service analytics

Sage Enterprise Intelligence's intuitive User Interface makes it easy to access enterprise information quickly and securely. Business users access and analyze enterprise data in a self-sufficient manner, which can improve visibility into their business, accelerate notification of important changes, and reduce time to decision by 20% on average.

Sage Enterprise Intelligence eliminates the need for disparate tools and specialized skills. It is fast to deploy and administer, and it uses technology that you already own.

“Our management team endorsed Sage Enterprise Intelligence immediately! Accessing and consolidating sales data across our enterprise is very easy.”

Edith Lauzon, Director of finance and operations, Avmor Ltd

Keep your data secure

The tight and secure integration of Sage Enterprise Intelligence with Sage ERP X3 ensures the reliability of critical business information. Sage Enterprise Intelligence's own security layer makes optimal use of existing standard database security to ensure the protection of your enterprise data and its integrity. Thanks to its powerful security features, you have the ability to add field level controls to your existing data.

Get real-time insights and foster collaboration and operational performance

The need for companies to have immediate access to critical business information has never been so important. Sage Enterprise Intelligence leverages the central database of Sage ERP X3 and other sources, which provides business users with coherent, real-time insight on enterprise data, supports decision making and fosters continuous cross-functional improvement. It includes sharing and alert functionality to provide managers with consistent, up-to-date information that plays a significant role in improving supply chain performance, resolving quality issues, improving marketing decisions, and building a faster, larger sales pipeline.

“It is easily twice as fast as our former reporting tools. That speed means our staff spend less time looking for data and more time acting on that data.”

Marc Lefebvre, Vice President and CIO (retired), Ganong Bros. Ltd

Features and functions

Analytical functionality

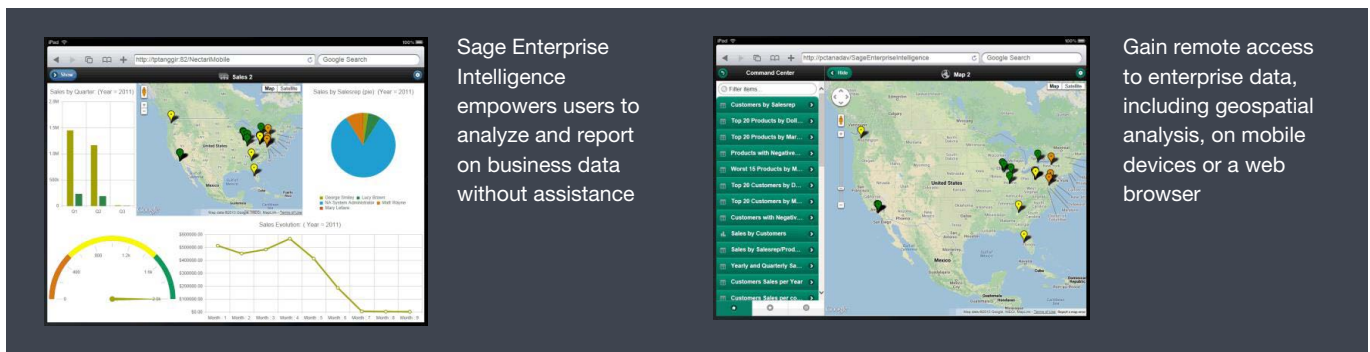

- Slice and dice
- Drill down/drill up through transactional data
